Professional Experience

REAL TIME DATA SERVICES

Jan 2026 – Present

Software Development Engineer 2

AceCloud | *AI-Powered Cloud Infrastructure* | [Live](#)

- Developed modules for an automated **cron-based billing platform** using **Python**, **Flask**, and infrastructure APIs to track resource usage, process consumption data, and generate monthly billing reports for **1,000+ customers**.
- Developed an AI-powered **support chatbot** using **LLMs**, integrating internal knowledge sources and backend APIs to answer user queries, retrieve account-specific resource data, and improve **user engagement** through faster self-service support.
- Migrated legacy **PHP-based WHMCS** admin panel modules to a modern architecture using **Next.js** and **NestJS**, improving **maintainability**, **scalability**, and alignment with the new platform codebase.

WASSERSTOFF RJ INNOVATIONS PRIVATE LIMITED

June 2023 – Dec 2025

Software Development Engineer

Litt Law | *AI-Powered Legal Contract Platform* | [Live](#)

- Engineered the backend for Litt Law, an AI-powered Indian-law contract drafting platform, using **Node.js**, **Express.js**, **PostgreSQL**, **Redis**, and **Drizzle ORM** within a **microservices** architecture powered by **gRPC**. Built **40+ REST APIs** with **JWT authentication**, achieving **99.9% uptime** and a **2.3× throughput improvement**.
- Implemented **RAG pipelines** with **custom embeddings** and **Pinecone** vector search for AI-powered legal contract generation, reducing inference latency by **48%**. Scaled the platform to support **1,500+ concurrent users** while maintaining **95%+ test coverage**.
- Built real-time collaboration features including **presence tracking** and **concurrent editing** using **SSE**. Developed a responsive, **SEO-optimized** frontend with **Next.js (SSR)**, **React.js**, **Redux**, **Tailwind CSS**, and **Tiptap**. Integrated **Razorpay** and **Cashfree** payment gateways with **100% transaction reliability** across **500+ monthly signings**.

Education

Institute of Engineering and Technology, Lucknow

Aug 2022 – Aug 2024

Master of Computer Applications (CGPA: 8.2 / 10)

Projects

PostMind AI | *AI Content Generation Platform* — [Live](#)

- Architected a **6-agent AI pipeline** using **Mastra AI** with sequential orchestration (**Persona Analyst** → **Trend Research** → **Content Generator**), generating **5–7 personalized content briefs** per request and significantly reducing **blank-page-to-publish time**.
- Engineered a **Writing DNA** fingerprint engine extracting **15+ quantitative voice metrics** from user posts at **zero LLM cost** with **100% reproducibility**. Built an adaptive feedback loop processing **6 implicit behavioral signals** using a **14-day recency decay** weighting model for personalized content generation.
- Optimized Docker image size from **2.66 GB** to **338 MB (87% reduction)** using **4-stage multi-stage builds**. Configured **GitHub Actions CI/CD** with **multi-platform Docker builds**, **SHA-tagged versioning**, and **health-check gated deployments**.
- Built a production-grade **Turborepo monorepo** with **3 packages**, **40+ shared TypeScript interfaces**, **11 RESTful API modules** with **Swagger** documentation, **3-tier rate limiting**, and **13 MongoDB collections**. Developed a **Next.js 14** frontend with **10+ pages**, including **real-time chat** and an **AI co-writing editor**.

Technical Skills

Languages & Frameworks: MERN Stack, JavaScript (ES6+), TypeScript, Node.js, Express.js, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux, Recoil, GraphQL (Basic).

Databases & Tools: PostgreSQL, MongoDB, Redis, Prisma, Drizzle ORM, Mongoose, Git, GitHub, Docker, Postman, AWS (EC2, Route 53), GitHub Actions, Jira.

Other Skills: REST APIs, Microservices, gRPC, JWT Authentication, OAuth2, WebSockets, CI/CD, Responsive Web Design, Cloud Deployment, React Hook Form, Zod, Razorpay, Cashfree, Recharts, Plotly, D3.js.

AI: LLMs, RAG, Pinecone, Mastra AI, Prompt Engineering.
